Profile

Final-year Bachelor of Science in Computer Science and Information Systems student at Rhodes University with a strong foundation in software development, programming, and system design.

A motivated and analytical individual with a strong interest in building practical software solutions through technology. Currently developing a web-based system as part of final-year coursework, gaining hands-on experience in system design, implementation, and collaborative software development.

Seeking a graduate opportunity where I can apply my technical skills in a real-world environment, contribute to team-based projects, and grow through mentorship, responsibility and continuous learning.

Education

Rhodes University – BSc Computer Science and Information Systems

2024 – Present

Relevant modules – Programming, Data analytics, Data Structures, Algorithms, Theory of computation, Operating systems, Security, Project management, Digital Transformations, Programming Language Translations (Compilers), Functional Programming.

Achievements

1st Place (Top 3), First Year Project – Rhodes University – 2024

1st Place (Top 3), Final Year Project – Rhodes University – 2026

Skills

Technical Skills:

- Programming – Python, ELM, Java, C, SQL, MongoDB, Assembly, PHP, Compilers.
- Web Technology – HTML, CSS3, JavaScript5.

Soft Skills:

- Time management
- Teamwork
- Strong Communication
- Initiative
- Adaptability
- Analytical

Tools & Platforms:

- Microsoft Office (PowerPoint, Word, Excel)
- Microsoft Project
- Visual Studio Code
- Git
- GitHub

Academic Experience

Personal Portfolio Website

Responsive website to showcase technical projects. Demonstrated front-end development skills.

Monster Hunt Game (Java)

Developed a game application as part of a 5-member team in first year. Applied object-oriented programming principles and game logic design. Awarded 1st Place (Top 3 Projects), Rhodes University.

ELM-Lab (Elm 0.19)

A collection of experiments and practical applications built with Elm, covering data structures (Binary Search Trees), task management, and game development.

Python Terminal Application (Python)

Built a command-line application as group of 3 for coursework. Focused on modular design and debugging techniques.

Coffee Shop Management System (Web-Based)

Application for order management and tracking. Improved workflow efficiency through structured system design.

Wedding Event Booking System (Web-Based)

A system to manage bookings, guest lists, and scheduling. Collaborated on both front-end and back-end components. Awarded 1st Place (Top 3 Projects), Rhodes University.
